RADIANT YOGA

The book 'Radiant Yoga' is a series of class 6 to 10. This series has been designed as course book for school children. The book is based on the textbook and curriculum recently launched by the National Council of Educational Research and Training (NCERT). It facilities the celebration of the first International Yoga Day on 21 June 2015. Each chapter has been arranged with holistic approach. It contributes to the physical, social, emotional and mental development of the child.

The book helps us to develop physical fitness, emotional stability, concentration and mental development among learners. Every concept and asana has collected from reliable sources and presented in this book with appropriate illustrations. In order to make the book more effective, we have illustrated the asanas and different postures through the images of the children belonging to the same age group of the class students.

THE BOOK DIVIDES INTO THREE SECTIONS:

The first section covers the introduction to Yoga and its history, Yamas and Niyamas, Pranayama, Bandha, Mudras and Shatkarm.

The second section covers the prescribed asanas with illustrations, their steps and benefits, etc.

The third section presents the worksheet which covers yoga activities.

Solved NCERT exercises have been provided at the end of section 2.

Every effort has been made to make this book reliable and up-to-date. Despite if any suggestion regarding the improvement, shall always be thankfully appreciated and acknowledged.

RADIANT GENERAL KNOWLEDGE

Radiant General knowledge is not about any specific knowledge. The term 'General Knowledge,' is a universal term that refers to the things that people can be expected to know. It relates to all knowledge but not anything specific. This way general knowledge has an unlimited area of contents.

Radiant General Knowledge is a series of eight general knowledge books for class 1to8. The series has been completely revised and updated and has an exciting new look. The content has been altered and enhanced thoroughly on the basis of the feedback we have received from principals and teachers across the country. We have done our best to restructure the content, starting with simple classroom activities, gradually leading the child into more challenging exercises.

SALIENT FEATURES

- Simple Language
- User-friendly
- A large Variety of Contents
- Innovative Brain Teasers
- Model Test Papers are given for the quick assessment of students.
- "Do You Know?" provides additional information
- Beautifully illustrated with relevant pictures as well as photographs.
- Answers at the end of the each book
- We have a firm belief that this series will surely quench the student's thirst for general knowledge and prepare them to face the challenges of the modern competitive world with

MORAL VALUE & PHYSICAL EDUCATION

"Education is not the learning of facts, but the training of the mind to think," said by Albert Einstein. Moral Value 1 to 5 is all about developing life skills and values among children. The aim of this series is to develop the mental and moral values of the child.

Teaching moral values is no easy job and when it comes to children the task becomes difficult. Moral Value for classes 1-5 is an endeavour to encourage a young learner to enquire, explore, discover people, places and situations. It focuses on letting children experience values rather than learn them.

Key Features of the Series:

- At the end of each chapter, a variety of exercises have been given like answer the following questions, fill in the blanks, true or false, multiple choice questions, fun activity.
- Valuable thought is given in every chapter to enhance the knowledge of little learner.
- Know New Words explain the meaning of difficult words.

We have made concentrated efforts to provide the best of material available to the students. Constructive suggestions of readers towards the betterment of the book will be thankfully acknowledged.

RADIANT
CREATIVE CRAFT

Radiant Creative Craft describes a wide variety of activities involving making things with one's own hands. Creative Craft is usually a hobby. Some crafts (art skills) have been practised for centuries, others are more recent inventions.

Key Highlights

- We have designed self attempt activities that lead children to the wonder world of art and activity.
- A large variety of activities has been provided in the series like: paper folding, easy to draw, tearing & pasting, thumb impression etc.
- Various colouring techniques have been used instead of a single method
- You will find that colouring work in some figures is guided by the outline to make it easier for children for children to fill colours.

Both children and adults enjoy arts and crafts. Children in schools may learn skills such as woodworking, wood carving, sewing, or making things with all sorts of material. Many community centres and schools have evening or day classes and workshops where one can learn arts and craft skills.

PLAY WITH COLOUR

A coloring book (or colouring book, or colouring page) is a type of book containing line art to which people are intended to add color using crayons, colored pencils, marker pens, paint or other artistic media. Traditional coloring books and coloring pages are printed on paper or card. Some coloring books have perforated edges so their pages can be removed from the books and used as individual sheets. Others may include a story line and so are intended to be left intact. Today many children's coloring books feature popular cartoon characters. They are often used as promotional materials for animated motion pictures. Coloring books may also incorporate other activities such as connect the dots, mazes and other puzzles. Some also incorporate the use of stickers.

RADIANT
ENGLISH GRAMMAR

English grammar is the way in which meanings are encoded into wordings in the English language. This includes the structure of words, phrases, clauses, and sentences, right up to the structure of whole texts.

There are historical, social, cultural and regional variations of English. Divergences from the grammar described here occur in some dialects. This article describes a generalized present-day Standard English – a form of speech and writing used in public discourse, including broadcasting, education, entertainment, government, and news, over a range of registers from formal to informal. There are differences in grammar between the standard forms of British, American, and Australian English, although these are more minor than differences in vocabulary and pronunciation.

RADIANT
LABORATORY MANUAL
SCIENCE

Laboratories used for scientific research take many forms because of the differing requirements of specialists in the various fields of science and engineering. A physics laboratory might contain a particle accelerator or vacuum chamber, while a metallurgy laboratory could have apparatus for casting or refining metals or for testing their strength. A chemist or biologist might use a wet laboratory, while a psychologist's laboratory might be a room with one-way mirrors and hidden cameras in which to observe behavior. In some laboratories, such as those commonly used by computer scientists, computers (sometimes supercomputers) are used for either simulations or the analysis of data. Scientists in other fields will use still other types of laboratories. Engineers use laboratories as well to design, build, and test technological devices.

Key Highlights

- Conceptual of the experiment
- Objective of the experiment
- Required apparatus and materials
- Relevant theory of the experiment
- Procedure
- Observations as needed for recording data in an auiliary and practical note-book
- Result and conclusion

Scientific laboratories can be found as research room and learning spaces in schools and universities, industry, government, or military facilities, and even aboard ships and spacecraft.
